Academic Profile

Computer Science researcher and educator qualified through the National Eligibility Test (UGC NET) for Assistant Professorship. Background in distributed cloud architectures, backend systems engineering, and embedded IoT computing. Experienced in designing scalable infrastructure, low-level microcontroller integration, and laboratory project mentorship, with a dedication to academic teaching and applied systems research.

Education

- Ramakrishna Mission Vivekananda Centenary College** *Aug 2025 – Present*
M.Sc. in Computer Science
- Status: Ongoing
- Ramakrishna Mission Vivekananda Centenary College** *Jul 2022 – Jun 2025*
B.Sc. in Computer Science Hons.
- CGPA: 8.68 / 10.0

Academic Qualifications & Honors

- UGC NET – Assistant Professor / Lectureship** *Qualified*
University Grants Commission (UGC) / NTA
- Qualified the National Eligibility Test (NET) for Assistant Professorship and Lectureship in Computer Science and Applications.
 - Certificate - [Verify](#) 🔗

Research & Publications

- Novel Heart Beat Monitor Using Arduino** *Nov 2022 – Jan 2023*
Research Project Under Prof. Manas Pal (RKMVCC)
- Conducted research on embedded sensor telemetry, analog signal filtering, and real-time biometric data capture using Arduino microcontrollers.
 - Abstract published and presented at the **5th Regional Science & Technology Congress (RSTC)**, West Bengal.

Professional Certifications

- AWS Certified Cloud Practitioner (CLF-C02)** *Nov 2025*
Amazon Web Services
- Certified knowledge of distributed cloud architecture, network topologies (VPC), IAM security controls, and high-availability systems.
 - Credly Credential - [Verify](#) 🔗

Systems Engineering & Technical Experience

- Cloud & Backend Systems Engineer** *Baranagar, Kolkata*
Vigilantia Praesidium Pvt. Ltd. *Apr 2025 – Jun 2026*
- Architected distributed cloud infrastructure using AWS EC2, S3, RDS Aurora, IAM policies, and isolated

Virtual Private Clouds (VPC).

- Designed backend web services and REST APIs with Python (Django), optimizing relational database indexing and query latency.
- Implemented CI/CD pipelines via GitHub Actions and containerized service microservices using Docker for reproducible deployment environments.

Cloud Systems Engineer

alrium pvt. ltd.

Koramangala, Bangalore

Jul 2025 – Mar 2026

- Maintained fault-tolerant, multi-region cloud infrastructure for global enterprise services using AWS EC2, Lambda, RDS, and SNS.
- Automated cloud deployment scripts and operational pipelines to enforce software verification and infrastructure testing standards.

IoT Research & Embedded Systems Intern - [cert](#)

alrium pvt. ltd.

Koramangala, Bangalore

Dec 2023 – Jun 2024

- Designed dynamic Wi-Fi communication modules facilitating edge-to-cloud bidirectional communication for real-time telemetry monitoring.
- Implemented low-latency Over-The-Air (OTA) microcontroller firmware updates and cloud state synchronization mechanisms.

Academic Projects

Automated WireGuard VPN Infrastructure

[Control Panel](#) 

- Implemented on-demand network tunnel infrastructure on AWS using serverless execution (AWS Lambda, API Gateway) to dynamically govern host instances.
- Configured automated DNS routing via Cloudflare APIs and implemented secure endpoint-to-endpoint WireGuard protocols.

Teaching Competencies & Technical Skills

- **Core Computer Science Areas:** Data Structures & Algorithms, Operating Systems, Database Management Systems (DBMS), Computer Networks, System Design & Microservices.
- **Languages:** Python, C, C++, Java, SQL, JavaScript.
- **Web Frameworks & APIs:** Django, FastAPI, RESTful Architecture, MVC/MVT Design Patterns.
- **Cloud & Systems:** AWS (VPC, IAM, EC2, Lambda, S3, RDS), Docker, Linux Kernel/Shell Scripting, CI/CD (GitHub Actions).
- **Embedded & IoT Hardware:** ESP32, Arduino, Raspberry Pi, Sensor Interfacing, Edge Computing Telemetry.
- **Databases:** PostgreSQL, MySQL, Aurora, MongoDB, DynamoDB.
